

Advances in Photochemistry, Volume 19

Setting the pace for progress and innovation ...ADVANCES IN PHOTOCHEMISTRY More than a simple survey of the current literature, Advances in Photochemistry offers critical evaluations written by internationally recognized experts. These pioneering scientists offer unique and varied points of view of the existing data. Their articles are challenging as well as provocative and are intended to stimulate discussion, promote further research, and encourage new developments in the field. In this volume Cis-Trans Photoisomerization of Stilbenes and Stilbene-Like Molecules Helmut Gerner and Hans Jochen Kuhn AFM and STM in Photochemistry Including Photon Tunneling Gerd Kaupp Photophysical and Photochemical Processes of Semiconductor Nanoclusters Ying Wang The Question of Artificial Photosynthesis of Ammonia on Heterogeneous Catalysts Julian A. Davies, David L. Boucher, and Jimmie G. Edwards
