

A Coral Reef Food Chain: A Who-Eats-What Adventure in the Caribbean Sea (Follow That Food Chain)

Welcome to a Caribbean coral reef! As you snorkel just offshore, you see brilliant fish, waving sea anemones, diving turtles maybe even a prowling barracuda! The coral reef is full of life from coral polyps snagging plankton to a moray eel gobbling up a goby fish. Day and night on the coral reef, the hunt is on to find food and to avoid becoming someone else's next meal. All living things are connected to one another in a food chain, from animal to animal, animal to plant, and plant to animal. What path will you take to follow the food chain through the coral reef?
