

## Vehicle Painters Notes

The vehicle refinish industry employs many thousands of personnel. They need practical, down-to-earth information to help them keep abreast of a job which is becoming more demanding in two respects - firstly it is increasing in volume because of the rising number of vehicles on the road; secondly, it demands more technical proficiency because of the introduction of new materials and paints. Vehicle Painters Notes is written by an author with many years experience of the automobile and paint industries. It covers every topic of interest and importance to vehicle paint shop personnel, from safety, masking and paint removing, to materials, rust, colours, washing and various paint faults - 104 topics in all. It is unique in its approach. Every topic is presented first in brief note form. If the reader requires more information, then through the easy-to-use cross referencing system the more comprehensive treatment of the topic may be consulted. Covering as it does the latest developments in paints, the book should be a useful manual for all vehicle paint and repair shop personnel, be they sprayers, foremen or managers.
