

The Kids Guide to Exploring Nature (BBG Guides for a Greener Planet)

This gorgeously illustrated guide will inspire kids to look closely at the world around them! Created by the experts at the renowned Brooklyn Botanic Garden, it teaches children how to observe environments as a naturalist does and leads them on 24 adventures that reveal the complex ecosystems of plants and animals in the woods, at the beach, and in a city park. Detailed, scientifically based drawings help young scientists identify hundreds of North American plants and animals, while dozens of fun projects include keeping a journal, conducting field experiments, and exploring nature with all five senses. Winner, Hands-on Science category, 2015 American Association for the Advancement of Science Subaru Prize for Excellence in Science Books The Kids Guide to Exploring Nature has also been named an honor book for the 2015 Green Earth Book Award in the Childrens Nonfiction category!
