

The Age of Specialization (Harvard Business Review)

Thomas W. Malone, a professor of management at the MIT Sloan School of Management, Robert J. Laubacher, associate director of the MIT Center for Collective Intelligence, and Tammy Jones, senior vice president of innovation and workforce solutions for ManpowerGroup, write about how atomizing knowledge tasks for vast communities of specialized digital workers can greatly improve quality speed, and cost. This article was first published in the July/August 2011 issue of Harvard Business Review.

The Age of Specialization (Harvard Business Review) (Unabridged) On a sunny morning in December 2013, as Google employees boarded the bus that would take them on their daily commute from Oakland to the company's headquarters, a conversation about specialization and its implications for the future of work was taking place. This conversation was part of a larger discussion about the implications of specialization for the future of work, a topic that has become increasingly relevant in the age of specialization. **Corporations in the Age of Inequality - Harvard Business Review** : The Age of Specialization (Harvard Business Review) (Audible Audio Edition): Todd Mundt, Robert J.
