

Control in Transportation Systems 2003 (IPV - IFAC Proceedings Volume)

The Symposium covers the system & control aspects of all transportation modes (road, public, rail, air, maritime) and will host a variety of contributed, invited and plenary papers from academia, traffic and transportation administrations, consultants, and industry. It will cover theoretical and methodological results, recent research, new trends, practical operation, and evaluation of transportation systems.

*Provides the latest research on Transportation Systems*Contains contributions written by experts in the field*Part of the IFAC Proceedings Series which provides a comprehensive overview of the major topics in control engineering.
