

Governance and Ownership (Corporate Governance in the New Global Economy Series)

This innovative collection brings together key papers which examine the motivations and interests of ownership groups, the processes of corporate decision making, and the consequences of particular governance arrangements for other corporate stakeholders. The careful selection of articles reflects the wide range of research methods used to study the complex inter-relationships involved. Part I considers the diversity of forms of corporate ownership. The following parts examine in detail the relationships between ownership structures and the various aspects of corporate governance. This insightful volume will be of interest to students, researchers and practitioners alike. 20 articles, dating from 1994 to 2001
