

Eye Wonder: Human Body

With exciting new interactive material, this edition of Eye Wonder: Human Body explores the inner workings of our bodies, from how the nervous system and the circulatory system work, to the essential roles played by our strong bones and agile minds. A precursor to DKs awarding-winning Eyewitness series, Eye Wonder was specially developed for children aged five plus, featuring astonishing photography exhibiting subjects within their natural setting offering a whole new level of information through powerful images. Vocabulary is accessible to young readers, with the meanings of new, subject-related words clearly explained. The combination of breathtaking visuals and informative, accurate text will hook even those children who usually avoid books. Reissued with a new jacket and eight new pages of mazes, look-and-finds, quizzes, and interactive activities, the new generation of Eye Wonder will capture readers imaginations and give them a reason to delve even deeper into each book.
