

## Other Spaces, Other Times

Capturing a behind-the-scenes glimpse into the world of science fiction, this unique autobiography by Robert Silverberg shows how famous stories in this genre were conceived and written. Chronicling his career as one of the most important American science fiction writers of the 20th century, this account reveals how he rose to prominence as the pulp era was ending-and the genre was beginning to take on a more sophisticated tone-to eventually be named a Grand Master by the Science Fiction Writers of America.
