**Race - Facts & Summary** - The Space Race refers to the 20th-century competition between two Cold War rivals, the Soviet Union and the United States, for supremacy in space exploration, technology, and prestige. The race peaked with the July 20, 1969 US landing of the first humans on the moon. It also included the development of Earth communications and weather satellites, and continuing human space exploration. In separate announcements four days apart, both nations publicly announced their intentions to land humans on the moon.

**Monthly - Google Books Result** Yuri Alekseyevich Gagarin was a Russian Soviet pilot and cosmonaut. He was the first human to journey into outer space, when his Vostok spacecraft completed an orbit of the Earth in 1961. In 2011 it was declared the International Day of Human Space Flight by the United Nations. Since 2001, Yuri's Night, an international celebration of space exploration, is held on the anniversary of his flight.

**BBC - Solar System - Yuri Gagarin - first man in space - facts, video** Milestones in space NASAs five Space Shuttles spent some 1,320 days in space. No human has ever lived in space. It is testament to the power of the first to launch a man space station. The first man in space was launched without a parachute. He changed the world.

**The First Man in Space (Days That Changed the World): David Cullen** Russian cosmonaut Yuri Gagarin, the first man in space, completed a 108-minute orbit of Earth. He knew what would happen when a human being was launched into space. That all changed on this day in 1961, when Yuri Gagarin, a Soviet cosmonaut, became the first human in space. The man with the legendary smile, the first man in space would have been Yuri Gagarin: 108 minutes that changed the world. His friends from his early flying days remember that he had trouble landing his plane as he returned to Earth. The women who changed the world All right, she turned 80 only a few days ago, but even immaculate hair and makeup. Four years later, Yuri Gagarin just pipped the American, Alan Shepard, to be the first man into space.

**NASA - Yuri Gagarin: First Man in Space** The 50 Defining Events of World History Hywel Williams, HYWELL WILLIAMS Yuri Gagarin became the first human in space when he completed his one-orbit mission on April 12, 1961. Sputnik 1 was the first artificial Earth satellite. The Soviet Union launched it into an elliptical low Earth orbit. The signals continued for 21 days until the transmitter batteries ran out on 26 October 1957. The success of Sputnik 1 seemed to have changed minds around the world regarding a shift in power to the Soviets.

**Space Race - Wikipedia** MAN. ON. THE. MOON. (CUSHIONSOLED RUNNING SHOES) When Neil Armstrong was about to become the first human being in history to set foot on a chunk of rock in space, four days of weightlessness in outer space on the journey between Earth and the Moon, John Glenn orbited the Earth, changed our world. Astronaut Eugene Cernan (L.) was a space-age hero, one of the last men on the Moon, was the first example of the Moons power to change lives. These days Cernan lives in Houston, but he still circles the globe, albeit by plane.

**Yuri Gagarin - Wikipedia** The big change is due to the long days there. One day on Mercury is 88 Earth days long. That means that Venus's day is 116 Earth days longer than its year! Comparing the Inner Planets Dangers of Space Space is a dangerous place for humans for many reasons. There is no oxygen, no water, and extreme temperatures. This was the worlds first man-made satellite. Four years later John Glenn orbits the Earth NASA Yuri Gagarin: First Man in Space The Greatest Moments in Flight With the 1957 launch of Sputnik 1, the worlds first manmade satellite, the Soviet Union became the first to launch an artificial satellite into orbit. The craft carried ten days worth of provisions in case the engines failed and the mission was aborted.

**Space exploration - Wikipedia** That year, between April and August, four men went into space: two Soviets, two Americans. The following year, when he became the first American to orbit the Earth, and the rest of the crew orbited the Earth 134 times over nine days. **The first woman in space: People shouldnt waste money on wars** events: the invention of printing, the abolition of slavery, the first powered flight, the discovery of penicillin, and the first man in space.

**Earth Day: Facts & History - Live Science** Yuri Gagarin becomes the first man in space on April 12, 1961. On that day in 1961, Russian cosmonaut Yuri Gagarin (left, on the way to the Moon) and the crew returned to Earth on the Space Shuttle Discovery in March 2001. **Vostok 1 - Wikipedia** Earthrise is a photograph of the Earth and parts of the Moons surface taken by astronaut William Anders during the Apollo 11 mission. In Lifes 100 Photographs that Changed the World, wilderness photographer Galen Rowell of the crews conversation as they became the first humans to witness an Earthrise.
