

Horse Book For Kids Age 6-9: Discover Horseback Riding For Kids, Horse Care For Kids, Horse Type, Horse Pictures For Kids & Other Amazing Horse Facts ... Curious! (Discovery Book Series) (Volume 2)

Does your child love horses or would like to keep a horse? If the answer is yes, this Horse Discovery Picture Book for Children that is part of Kate Cruises Discovery Book Series is what your child & you as a parent are both going to love. Inside the horse discovery book your child will learn about things like: * Evolution Of Horses Until Today * Home Of Horses * Senses Of Horses * Behavior Of Horses * Cute Horse Babies * Beautiful Golden Horses * Most Rare Horse Breeds In The World * Horses Relation With Donkeys * Horses & Humans * Horse Riding & Tricks * Caring For Your Horse * The Most Amazing, Curious & Intriguing Facts About Horses and other surprises that you did not know about horses... This book will take your child through a journey of fun facts, amazing discoveries, curious and intriguing stories about horses, and beautiful & amazing pictures of horses. You will find some interesting revelations and secrets you probably never heard about horses. Some myths and truths, and other curious stuff about horses that children just find cool and groovy to know are also included. Did you know that no two horses are identical! Inside you will find out the most amazing stuff about horses that there is to know about! As a mother of 3 young children and with the experience as an elementary teacher, science researcher, writer and publisher of many publications for kids, Kate Cruise has learned to listen & to interact with kids. It is a book series inspired by kids and for kids! Kids learn about new and interesting facts so that a combination of both the curious and the new materials and facts together with the visual aspect of the pictures. Children are entertained with the coolness factor of the discovery book plus they learn some new and a little bit harder to retain facts simultaneously with the cool stuff and this is how the child is going to retain all of the information. The discovery books work in

synchronization with the brain and not against the brain like some dull textbooks try to teach things. It is a fact that kids just love these discovery picture books about weird animals and weird stuff that the animals are doing because they love the coolness and grooviness factor of the books. Parents are super satisfied because their children show interest for things on a higher level of interest as usual. The discovery concept of this horse book for example transforms a little bit more dry information and facts into brain friendly information that the child will retain & that the child will be able to use as active information later on. This horse discover book is brain friendly and works in synchronization with your child's brain not against it. Your child will even remember facts and information that it would not have retained with a traditional textbook. Getting a child involved in the learning and discovery process is key and once your child gets started with raising all kinds of questions, you actually have done a great job as a parent because the active and creative process of raising questions independently is where intelligence starts to develop and grow into a totally new dimension. If your child asks lots of questions you actually have the proof that providing discovery books to your child actually works because children who discover with their own senses and in an active and interactive way are able to develop intelligence on a much higher level than children who are not asking any questions and who are passively sitting in front of a TV all day long. Stimulation of thought and contemplation increases intelligence and the brain power and TV kills the brain cells of your child. Parents and home-schoolers alike are reporting unprecedented results from using her books as learning materials & they get results even with children who usually hate reading books & who have problems learning and retaining new & dry information. Note: This book is suitable for children ages 5+
