

Transportation Point Spring 2011

Transportation Point gives those interested in the business of transportation an opportunity to take a deeper look at the developments transforming the industry and profession. The Spring 2011 issue is focused on creating an effective toll organization. With the decline of the gas tax, tolling is an important, proven source of alternative funding for Americas roads. The executive director and CEO of the International Bridge, Tunnel and Turnpike Association, Patrick Jones, discusses the importance of clear visions and strategies in effective toll agencies; Three of HNTBs experts outline 10 fundamentals cash-strapped departments of transportation should follow when looking to incorporate a strong tolling arm; and Two respected tolling executive directors, Mike Heiligenstein with the Central Texas Regional Mobility Authority and Javier Rodriguez with the Miami-Dade Expressway Authority, share their experiences, concerns and advice for creating and operating a successful toll practice. Transportation Point is published by HNTB Corporation, a leading infrastructure firm that plans, designs and constructs many complex transportation projects nationwide. For more information, visit www.hntb.com.
