

## The Scribal Realm of Dreams & Visions

Since the beginning of time, God has positioned His most trusted scribes as witnesses, keepers and heralds over some of the most sacred oracles in the governance of heaven and earth and **COMMANDED** that they record them, especially those released through dreams and visions. Though scribes have been faithful in answering the call, they have not always understood their unique experiences or the critical importance and weight of their roles and activity in the dream realm until now. In her book *The Scribal Realm of Dreams & Visions*, Theresa Harvard Johnson brings great clarity to the scribal realm of dreams and visions a strategically designed, apostolic atmosphere for scribal encounters and activities in the supernatural realm. Drawing wisdom from the life and ministry of the scribal prophet Habakkuk, a foundation is set to uncover how God can strategically position them through dreams for personal, generational and eternal impact... just as he positioned Habakkuk to not only grow into and live by faith, but to engrave an answer to one of the most critical questions of his time.
