

Jimi Hendrix: Starchild

Genius guitarist Jimi Hendrix was born into this world on Nov 27, 1942, though he was not really one of us, proclaims Curtis Knight, a long-time friend and original band member of Jimi's first group the Squires. But this is not just another book about Jimi's musical career. And while fans may know of Jimi's rather radical lifestyle, there was, says the author, a more spiritual -- metaphysical -- side. Not many people realize that Jimi's life was greatly influenced by the paranormal. In this book, Curtis Knight reveals that Hendrix had a good number of personal brushes with the unknown. For example: * UFOs seemed to follow Jim around, and his life was even saved one night by an angelic-like being who arrived in a spaceship. * Jimi had numerous prophetic dreams and out of body experiences. * He knew about the existence of a race of beings living inside our earth. * Jimi was telepathically tuned to his close friends and kept in touch with them via ESP. * Hendrix realized the significance of color and sound in the performance of his music in order to elevate consciousness. * Jimi knew exactly when he was going to leave the physical plane and predicted his passing in the words of a song.
