

Project Finance: Get Rich in 1 Year -- What The Rich Invest in That the Poor and Middle Class Do Not -- Real Estate, Options, Gold, and Multiplying Your Money Every Month to Become Wealthy

Some people may have fun while being poor but I certainly didn't find being poor funny. The National Psychiatric Board has announced that people who feel that they are failures are 52% more likely to commit suicide, especially in cultures where failure is shamed upon. People who are unemployed are also at risk. Although, money isn't everything when you have family, except lack of money almost always leads to divorce. The Better Business Bureau states that 90% of businesses fail before their 5th year. In addition, I predict the biggest stock market bubble in history is going to burst in 2016. Warren Buffet predicts a 50% correction of the stock market this year. Real estate magnate Robert Kiyosaki predicts a global economic depression in 2016. Business mogul Donald Trump has said publicly that we were clearly in a bubble and anyone can see that we are. You can see that the middle class is in deep deep trouble. Specifically those who invest in Stocks, Bonds, and Mutual funds. With Project Finance we want to teach both new and experienced investors the very same technique that I used to make my wealth. You might say to yourself: Why does he want to help you? Why would he write a book and give away all of his secrets? Why would he show me how he made his money and how to make money today in 2016 and going forward? Most other books just show you how you could've made money last year, last decade, last century... that information is not valuable now. This is too good to be true. I started my company Gonell Venture Capital in 2006. I was just 17 years old, I had just raised half a million dollars from family and friends who wanted to invest in stocks but weren't all that excited to learn all about stocks and Wall st. By the end of 2006 the stock market had risen almost 25% and my family was very happy until I took all of their money out of stocks because we were

in a bubble. A lot of people falsely claim to have predicted the bubble, I do not see myself as a prophet just a person who understands markets. I saw that the P/E ratio of the S&P 500 went above 19 which is above bubble territory. As a result I exited all of my stock positions and bought physical gold bullion. After the crash the Federal Reserve started to print money and the price of gold sky rocketed to 1,800. I still hold massive amounts of precious metals for when the stock market and the dollar collapses in 2016. Thousands have already joined Project Finance and have already started implementing the most important lessons of the book to amass wealth and have money flow to them very month like my \$10 million dollar fund. For example, you can make an extra \$500 a month with \$3,000 of capital at home from your computer selling options contracts. In this book I show you how to sell these intricate options contracts from your computer on the stock market for 25% a month on your money and up to 100% a month in commodities markets. Join the 500,000 who have already become a part of Project Finance. This Book Includes: - How to make 100% on your money from home using options derivatives. - How and where to invest to earn cash flow every month. - The trade of the century. - How to survive this coming collapse that all of the biggest names in business are warning about. - What investments to stay away from and will become toxic very soon - An easy to learn explanation to where our economy is currently.
