

Auto Suggestions: We know that you talk to your car. Ever wonder what your car is telling you?

Auto Suggestions is a delightful confection that teases you into connecting your car issues with your life issues and the same solutions for both. This is a humorous book suggesting that your 25 most common car or vehicle problems relate to your life problems. For example, if your windshield wipers don't work, clarify your life vision. If your battery dies, maybe you need to identify what gives you a charge. Have fun looking up your car symptoms, diagnosis, and your car and life upkeep maintenance. INTRODUCTION If your CAR breaks down, maybe you need to fix your CAR. Maybe you need to... Learn from your car, your truck, your motorcycle. The Princeton University Engineering Anomalies Research Laboratory found that through mental concentration alone, human beings are able to affect the way certain kinds of machines operate. With the aid of the Magnetoencephalogram (MEG), scientists at the Japan National Institute of Bioscience have plotted the electrical activity of the entire brain. New evidence shows that the power of the human mind extends beyond the brain. Scientists in Japan are studying the rate of transferring information from a sensory organ to the brain hemisphere. Software engineers have already created computer games in which brainwaves of thought can manipulate game action. Japanese automaker Honda has developed a technology that uses brain signals to control simple moves of a robot.
