

# Foseco Ferrous Foundrymans Handbook, Eleventh Edition

The Foseco Ferrous Foundrymans Handbook is a practical reference book for all those concerned with making castings in any of the commonly used alloys, by any of the usual moulding methods. International SI units are used throughout, but in almost all cases conversions to the more familiar Metric and Imperial units are given. Wherever possible, Casting Alloy Specifications include equivalent specifications for several countries as well as international specifications. Individual chapters cover the casting of light alloys, copper-based alloys, all types of cast-iron and steel. For each group of alloys, specifications and typical applications are described, together with details of melting practice, metal treatment and casting practice. Sand moulding materials, including green sand and chemically bonded sands are also included.

**Foseco Ferrous Foundrymans Handbook. Edition No. 11** Since publication of the first edition of the AFS Casting Defects Handbook, it has been considered the Foseco Ferrous Foundrymans Handbook, 11th Edn. Foseco Non-Ferrous Foundrymans Handbook. Eleventh edition. Revised and edited by. John R. Brown. OXFORD AUCKLAND BOSTON JOHANNESBURG **Foseco Ferrous Foundrymans Handbook.
