

## Rock n Roll

Sound Trackers is a series of books that documents the greats of popular music over the last 50 years. From Bill Haley to the Beatles, Pink Floyd to Prince, it looks at their lives, their music, their careers and at their fans, the teenagers, their fashions and how they spent their time. Since the 50s popular music has had a tremendous impact on modern culture, not only on the young, but throughout society. These books explore how Rock n Roll charts the greats of the 50s when, despite prejudice, essentially black music became the required sound for a generation and teenagers, for the first time, established an identity all their own.
