

Steve Jobs: Visionary Entrepreneur of the Digital Age (Crabtree Groundbreaker Biographies)

Steve Jobs was a pioneer of the personal computer age. This compelling biography describes his life and career as a visionary entrepreneur who helped usher the world into the digital age in style and comfort. Born in 1955, Jobs grew up tinkering with electronics in the garage with his father. Although he dropped out of college, he would follow his passion for electronics and become well known for founding the computer company Apple. Equally well known for his uncompromising product philosophy, he continued to innovate in the fields of animation, personal electronics, and marketing. Both Jobs and Apple had their share of ups and downs. After an amazing comeback in the 2000s, Jobs was diagnosed with cancer and passed away at the early age of 56 in 2011.
