

## Sunflowers and Other Plants (Life Cycles)

How does a duck lay eggs? How does a tadpole change into a frog? An in-depth look at the life cycles of animals and plants, with concise, informative text and stunning photographs. The series explains every stage of animal and plant life cycles, including breeding, life stages and death. Each book: Focuses on the life cycle of one featured animal/plant and goes on to examine the similarities and differences in related species. Looks at how the different environments of the world affect life cycles and create species with different attributes. Includes stunning, close-up photographs. Contains a spread full of fascinating facts and information for further interest. Contains a table of contents, an index, and a glossary.
