

Sea Turtles (Sea Creatures)

An exploration of sea turtles. It is part of a series in which each volume covers a particular group of sea animals, including the natural history, adaptations, population status (safe, threatened or endangered), interactions with humans and other animals, and conservation efforts. The text begins with a you are here description of a deep-sea meeting between the reader and the creature, covering where to look for the animal and the equipment needed to find it and join it in its watery home. The volume then continues to explain this wondrous creature that the reader has just met.
