

Transplanted

Transplanted is the remarkable story of Erma and Delmer Martin and their incredible journey through the ultra-high-tech world of modern medicine and liver transplantation, but from the perspective of a culture dedicated to a simple life mostly devoid of futuristic technologies. This story is beautifully told and encompasses not just the medical miracles that define transplantation, but more importantly, it encompasses the fierce love and devotion between two people, the intimate details of their family and the effects of Ermas health issues, and the love and support of their community. It is a story of hope and unshakeable faith - a faith in God and His Son Jesus Christ, the eternal physician - a story of successes and failures, of realized dreams and unfulfilled opportunities. Ermas story, told through Delmer, should be an inspiration of hope to all those who read it, and a model for those who must endure it.
