

Understanding Auto Technology and Repair Video Series Tape 13: Understanding Automotive Suspension and Steering Systems [VHS]

This brand new series of 18 videotapes is excellent for the beginning automotive student! They provide a visual introduction to understanding and diagnosing all major systems of the automobile. Each theory tape introduces the purpose of the system, its major components, and provides an explanation of the systems functions. Coupled with a troubleshooting tape, the student is given a general overview of common problems confronted in the workplace. With the same diagnosis procedures used throughout the videos, procedures are reinforced through repetition. An Instructors Manual includes review questions to help track students progress and comprehension of the videos.
