

Water Beds: Sleeping In The Ocean

Water Beds: Sleeping in the Ocean is a soothing bedtime story that answers the question of how marine mammals animals that breathe air manage to sleep in the ocean. Youngsters meet ten marine mammals, including sea otters, bottlenose dolphins, manatees, harbor seals, humpback whales and walrus, and learn about each animal's unique sleeping habits. Although the brief portraits are based on up-to-date scientific research, author Gail Langer Karwoski weaves the facts into simple, poetic language. Connie McLennan's rich oil paintings capture the ocean's habitats and its appealing creatures. The story invites children to drift into peaceful sleep on the gentle waves of imagination. An educational supplement in the back of the book includes teaching trivia about marine mammals, their sleep habits, and how they have adapted to their watery environment, and make-your-own marine mammal craft using various animal adaptations. Ages 2-8
